Alexion STEM Learning Lab

Alexion's STEM Learning Lab is a dynamic, community-focused space designed for hands-on learning at every age.

This flexible space, located at 100 College Street in the heart of New Haven, Connecticut, can transform into a scientific lab, classroom, seminar or exhibition area to meet your needs. To encourage support for science, technology, engineering and math (STEM) among our local community, there is no fee to use the Lab for STEM purposes.

Scientists, engineers and business professionals from Alexion, as well as the local community, are on hand to guide learners through an engaging and educational experience.

We can host:

- **School groups** exploring science, from basic concepts to more advanced techniques, and discovering what happens inside a pharmaceutical lab
- **Career programs** that encourage learning about the different types of STEM careers available in the pharmaceutical industry
- **Job training programs** for adults without science backgrounds
- **Educational seminars** and more

Interested in scheduling a program for your organization? **Complete the form below** and email to: STEMLearningLab@alexion.com
